## **DETAILED ACTION**

### ***Response to Amendment***

Claims 1, 3-9, 13-41 are in the case.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1, 3-9, 13-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buehrle II et al (6,024,060) in view of Manka et al (5,834,407).

Buehrle II et al teach a camless internal combustion engine. Manka et al teach a low-phosphorus or phosphorus-free lubricating oil composition containing an extreme-pressure additive comprised of metal and phosphorus, provided the amount of phosphorus contributed to the low-phosphorus or phosphorus-free lubricating oil composition by the extreme-pressure additive does not exceed about 0.08% by weight based on the weight of the low-phosphorus or phosphorus-free lubricating oil composition (See col. 10, 15 and 28). Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the low-phosphorus lubricating oil composition in the engine of Buehrle II et al as taught by Manka et al in order to reduce wear, noise and exhaust emissions.

***Response to Arguments***

2. Applicant's arguments filed on October 10, 2002 have been fully considered but they are not persuasive.

3. In response to applicant's arguments, the recitation of "a camless" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

4. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the low-phosphorus lubricating oil composition in the camless engine in order to reduce wear, noise and emissions.

**Conclusion**

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
